

Project Profile: Hugh Street, London, UK

Sector: Hotels

Client: Property Fund

Our Role: Structural engineering

Contract Completion: 2020

Description of Contract:

This project was a refurbishment of an existing hotel for a property fund in central London. This scope included joining three properties together. The internal refurbishments involved the removal of several structured walls.

LSY Engineering Consultants Ltd designed several steel frames to accommodate this project requirement. The project also involved the installation of a new mansard roof and lowering of vaults in the basement which required traditional underpinning.

Our brief was to work as part of the design team as lead structural engineers in the project providing the following services:

- Structural design
- Site inspections
- Underpinning design
